

La voile de Fortune

Fortune	
Matière	Dacron
Surface	150 m ²
Chute	11 m 70
Bordure	15 m 50
Envergure	10 m 80
Grammage	180 Gr/m ²
Observation(s) :	

The diagram illustrates the dimensions of the sail 'La voile de Fortune'. The width of the sail is indicated by two horizontal double-headed arrows: one across the top (labeled 'Envergure') and one across the bottom (labeled 'Bordure'). Four specific points are highlighted: 'Point d'envergure (et point de drisse TB)' at the top left, 'Point de drisse centrale' at the top center, 'Point d'envergure (et point de drisse BD)' at the top right, and 'Point d'amure (et point d'écoute)' at both the bottom corners. The sail itself is depicted with a central rectangular panel featuring diagonal hatching, and the overall shape is a triangle with a curved upper edge.
