<b>Grand Foc</b>	
Matière	Dacron
Surface	27 m <sup>2</sup>
Guindant	14 m 25
Chute	8 m 40
Bordure	7 m 10
Grammage	360 Gr/m <sup>2</sup>
Observation(s) :	

  

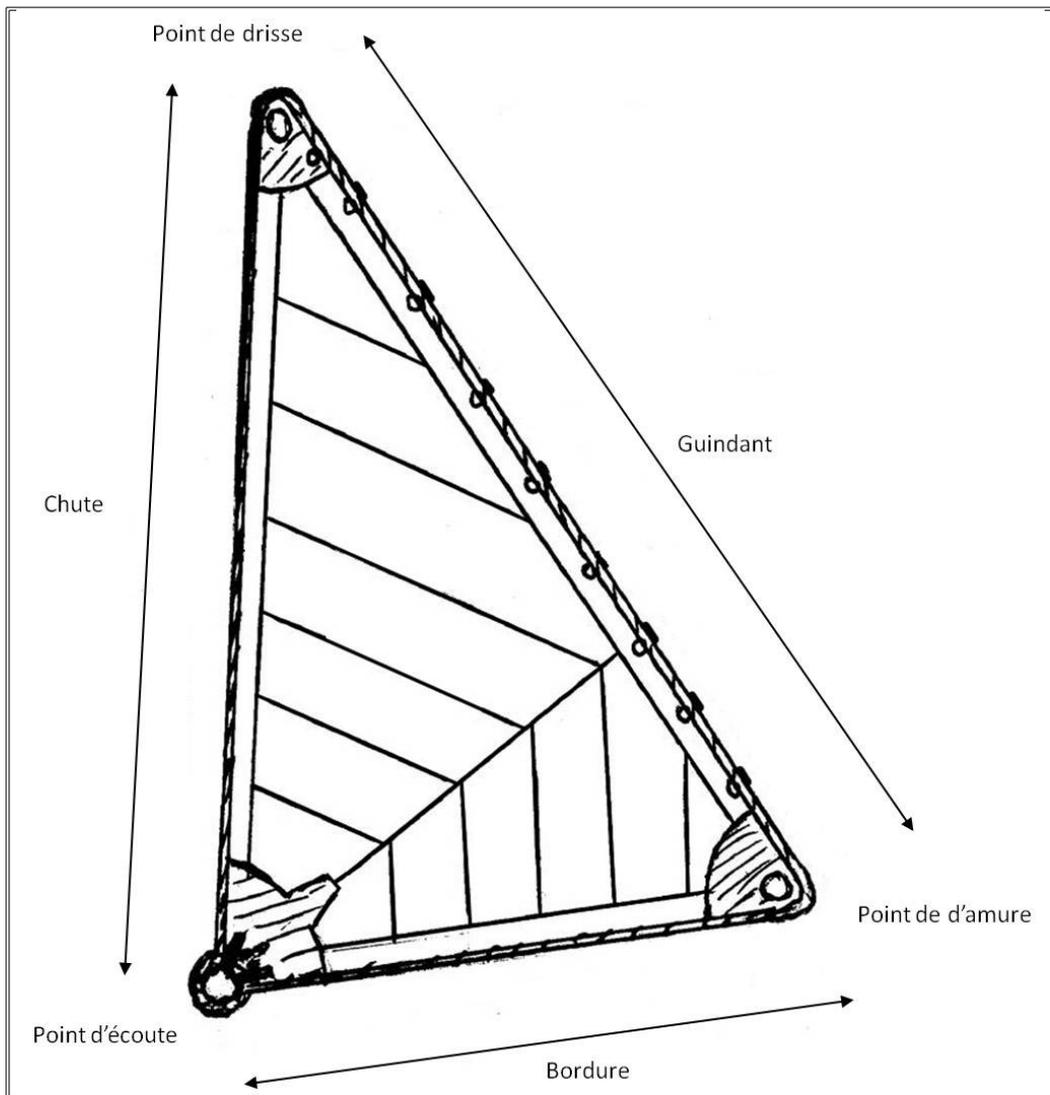

The diagram illustrates the structure of a Grand Foc sail. It is a triangular sail with a vertical luff (Point de drisse at the top, Point d'écoute at the bottom left) and a diagonal leech (Point d'amure at the bottom right). The height is labeled 'Chute' and the width is labeled 'Guindant'. The bottom edge is labeled 'Bordure'. The sail is shown with a complex internal structure of battens and stays.
